## Cleaning, Sanitation and Hygiene Solutions

[dominant.com.au](http://dominant.com.au)

Dominant manufacture commercial cleaning, hygiene, and sanitation products for a broad range of industries across Australia.

The pressures within the wine industry today are well documented. Organisations are under increasing pressure to not only deliver product that stands out in a crowded marketplace, but to also deliver financial results. We provide consistent quality with an environmental impact focus to achieve your desired results.

**Our goal is to help you achieve the highest quality process from grape to glass.**

Our objectives are your objectives →

- Reduce risk of product taint
- Reduce risk of rework
- Reduce down-time of production whilst cleaning occurs
- Lower sodium discharge levels
- Lower water usage and speed up cleaning time
- Increase operational efficiency
- Less tank corrosion

**Dominant**

## Quality Cleaning Products

Dominant have been developing and manufacturing high quality cleaning products for over 60 years, but we offer much more than that.

## Our Certifications

Dominant is committed to delivering high-quality products with consistent and reliable performance. That is why we have implemented and maintain management systems that exceed the requirements of International ISO standards. Allowing you to have confidence when using all Dominant products and services.

## Environmentally Friendly

Dominant have a range of products that are garden and septic safe to minimise environmental impact.

We also manufacture highly concentrated products which means that less is used and therefore less packaging requires recycling or goes into landfill.

## Education & Training

Onsite or online training modules and assessments to educate and evaluate competency of users.

- Chemical Awareness Training
- HACCP and Food Safety

Training Module:  
**Chemical Awareness**

## Clean In Place

Our team understands the challenges of managing a Clean in Place (CIP) system. Strict cleaning procedures are necessary to ensure great outcomes and maintain reliability of equipment and machinery.

## Technical Assistance

We have a team of qualified service technicians available for installation, and ongoing service and maintenance of dispensing equipment.

## Research & Development

Our Research & Development (R&D) team, based in Adelaide, South Australia, have worked closely with a number of leading wineries to produce our range of products and continue to provide ongoing support to our customers.

## Effective Cost per Use

Dominant manufacture many products in concentrated quantities. These can then be diluted with water into a reusable spray bottle.

## Food Safety

We have a range of products and services for safe food preparation and avoiding cross contamination.

- Non-perfumed, odourless products that will not taint foods
- Sanitisers for reducing bacteria levels
- Hygiene monitoring options to validate correct cleaning & sanitation procedures

## Compliance Documentation

We understand food safety regulations and requirements and can provide supporting documentation including:

- Safety Data Sheets
- Chemical safety wall charts
- Product application charts
- Allergen statements

# The importance of tank cleaning →

As tartrate crystallises out of wine, it forms a deposit coating on the tank wall. The amount of tartrate deposit can vary depending on storage time, and conditions such as cold stabilisation which forces the tartrate out of solution.

During vintage a brown deposit can also form in the tanks. This deposit is very difficult to remove given the proteins and tannins it contains. With time, tannins can polymerise making the deposit even more difficult to clean.

Removing these deposits was the focus for the Dominant R&D team. We have developed a range of formulated cleaning products with surfactants to assist with the removal of the deposits.

Our products work with traditional CIP (Clean In Place) methods used to clean wine tanks. They are made up as a solution that is pumped through a spray ball or similar device hanging in the top of the tank, which then cascades down the walls to the bottom and is recirculated.

Our wine industry products are also compatible with more specialised devices such as Gamajet, Fury or Turbodisc units, which further assist the process by giving much greater pressure and better cleaning ability.

In order to manage run-off from the cleaning process, Dominant has formulated potassium-based products to reduce sodium ions in effluent, and alkaline products for greater safety in use. These complement our conventional sodium hydroxide based products.

		Heavy Duty Cleaning	WHS Benefit	Environmental Benefit

## Tank Cleaners

### BWL

Heavy duty liquid containing 50% w/v sodium hydroxide, plus low foam detergent and sequestrant.

- Suitable for automatic dosing and control by conductivity, ensuring consistent delivery of product and reproducible cleaning results
- Prevents scale forming on tanks and equipment even in hard water areas

### BWP

Heavy duty powder containing 93% w/w sodium hydroxide, plus low foam detergent and sequestrant.

- Wets and penetrates tartrate deposits in wineries and assists with brown film removal
- Can be used with high pressure units

### Tank Wash II

Heavy duty liquid containing alkaline builders, plus low foam detergent and sequestrant.

### Vinclean

Powder for tank cleaning and tartare removal. Non caustic formula is much safer for operators and doesn't require dangerous goods storage requirements.

### Vincirc

A medium duty powder that can be used in recirculating cleaning systems for de-staining, fast rinsing, and effective cleaning of wine residue.

### Potassium Plus

Highly concentrated blend of potassium hydroxide & sodium hydroxide. Highly effective at rapidly removing fat, tartrate, and protein deposits.

## Sanitisers

### Oxypower LF

Low foaming destainer and sanitiser designed for use in wineries where chlorine bleaches are not being used.

### Oxysan

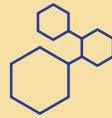

Oxysan is an equilibrium mixture of peracetic acid and hydrogen peroxide. It is a very effective sanitiser, with the additional benefits of being non corrosive to stainless steel and reducing biological oxygen demand (B.O.D.) in effluent, thereby reducing the treatment needed for the effluent.

### MOX

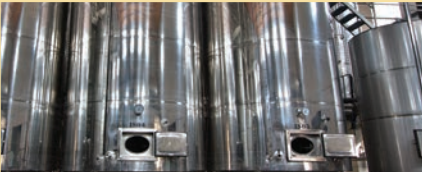

A foaming oxygenated cleaner sanitiser for cleaning and bleaching the outside surfaces of bottling lines, tanks and floors.

### Ethanol 70%

This is a ready to use sanitiser sprayed onto surfaces after breaks to ensure they remain sanitised. Spray on and leave to dry before resuming processing.

## Acidic/Neutralisers

### Citric CIP Liquid

Concentrated solution containing citric acid designed for neutralising caustic residue in wine tanks and lines after using highly alkaline products.

## Floors & Outside Tanks

### HD Scrubber

For large areas where a floor scrubber with wet pick up is used, HD Scrubber is recommended. This is a heavy duty cleaner with a low foam profile making it suitable for use in scrubbing machines.

### Hyfoam

The outside of wine tanks often gets covered with a black mould build-up. Hyfoam is a liquid chlorinated cleaner that can be sprayed on with a foamer or high pressure cleaner to remove these deposits.

## Bottling Plant Products

### Line Lube

A combined cleaner and lubricant for slat chains. Line Lube contains a biocide which prevents mould forming on the lines.

### Shor Kleen

Graphite lubricants used in the bottle making process can create unsightly black deposits on the side of slat chain lines. This is easily removed using Shor Kleen, a powerful solvent degreaser.

# Products for a safe and clean cellar door →

**Dishwashing & Glass Washing**

**Hand Hygiene**

**Washrooms**

**Food Preparation**

**LUNA Hand Care Range**

**Glassmaster**

Low foaming, free rinsing liquid detergent designed for glass washing machines.

**Saniglass Manual Detergent**

Detergent sanitiser for cleaning and sanitising glasses washed manually.

**Hi-Tech Dishwashing Liquid**

Concentrated product with excellent all round balance of performance and economy.

**Tornado Dishwashing Liquid**

Concentrated chlorine based product with destaining and descaling properties.

**Typhoon Dishwashing Liquid**

Premium quality, non-caustic automatic dishwashing detergent.

**Glisten**

An effective and concentrated rinse aid for commercial dishwasher machines.

**Café SA12 Manual Detergent**

Economical and effective, non-fragranced manual dishwashing detergent.

**Vero Antibacterial Detergent**

Clean and sanitises dishes in one step. Kills bacteria - E Coli, Salmonella, Listeria, Staphylococcus aureus.

**Reverse Osmosis**

**Masterglass**  
A strong alkaline formulation for grease and lipstick removal. Contains scale inhibitors to keep glass washers clean.

**Crystal LF**  
Concentrated acidic rinse aid for a sparkling finish on glasses and crockery.

**Aquista**

Odourless and fragrance free hand cleaner especially made for food preparation areas.

**4 All**

Hand cleaner and all over body wash with a musk fragrance.

**Extra Mild**

Extremely gentle wash for those with sensitive skin who wash frequently.

**Hand Sanitisers**

**Mia Kleer®**

An alcohol based hand sanitiser for use without water. Ideal for use when hand washing facilities are not available. Comes in a large range of sizes and dispensing options.

**Saniclear®**

Alcohol based, antibacterial hand sanitiser. Listed in the ARTG. AUST R 228023.

**Sani Foam**

An antibacterial, alcohol based foaming hand sanitiser that kills 99.9% of bacteria. Available in foaming wall dispenser for easy application.

**Alcohol-Based Hand Sanitiser**

World Health Organisation approved formulation. Non-fragranced. 80% v/v ethanol with a spray pump.

**Glaze Sheen**

Premium quality, ammonia-free glass and chrome cleaner ideal for windows, mirrors, stainless steel, chrome, glass and shiny surfaces.

**Bathroom & Toilet Cleaner**

An all-round bathroom and toilet cleaner that cleans, disinfects and descales all surfaces.

**Crème Cleanser**

Multi-purpose, hard surface cleaner that'll leave your surfaces with a sparkling finish.

**Urinal Air Freshener Mats**

Maintain a fresh smelling urinal.

**Floor/Hard Surface Disinfectants**

**Hospital Grade Surface Disinfectant**

Proven to be effective in killing a broad range of bacteria on hard surfaces.  
→ Kills COVID-19  
→ Listed in the ARTG, AUST L 344070

**LCC Sanitiser**

Chlorinated detergent sanitiser to clean, bleach and sanitise.

**Domchlor**

All-round chlorine sanitiser soaker for hard surfaces killing a broad range of bacteria.  
→ Kills COVID-19  
→ Listed in the ARTG, AUST L 388764

**Laser**

A heavy duty cleaner for removal of fats, grease and other soiling from hard surfaces in a kitchen or food preparation area.

**Bacban**

A no-rinse sanitiser. Bacban provides sanitation to clean hard surfaces without needing to rinse.

**Saniclean**

A moderately alkaline quaternary ammonium based detergent sanitiser. Cleans and kills bacteria in one easy step.

**Sanibac**

A no-rinse quaternary ammonium based surface sanitiser.

**Gorilla**

A non-caustic oven and grill cleaner that gives excellent removal of baked on deposits using a blend of detergents and natural solvents.

**Air Deodorisers**

**Air Deodoriser**

A refreshing blood orange air freshener spray to neutralise odours.

**Spring Mist**

A deodorant cleaner with a lingering sweet, floral fragrance.

**Miniburst Fragrances**

Highly concentrated metered aerosol air fresheners with a choice of fragrance.

A premium range of hand and personal care products with a choice of fragrance and dispensing options, for your washroom.

**Product range:**  
→ Hand Wash  
→ Hand, Hair & Body Wash  
→ Hand Lotion  
→ Hand Sanitiser

**Fragrances available:**  
→ French Pear  
→ Grapefruit & Lemon Verbena

**Ready to Use Plant Powered Cleaning**

**PLANT POWERED**

Eco-friendly formulas made with plant based ingredients. Lightweight, ready to use products with no dilution needed for convenient cleaning.

A partnership with Dominant is protecting  
your brand, your product and your customers.
