

Colour Coded Safety Chart

GENERAL PRECAUTIONS: When handling hazardous chemicals wear chemical resistant gloves and eye protection. Avoid contact with skin and eyes. Avoid breathing dust and fumes. If poisoning occurs, contact the Poison Information Centre (24 Hour Medical Emergency Line, 13 11 16) or a doctor in your state. **ENSURE YOU HAVE SAFETY DATA SHEETS FOR ALL PRODUCTS.**

CODE	HAZARD GROUP	PPE	FIRST AID	SPILLAGES
<div>A</div>	ACID-BASED CLEANERS Causes burns upon contact with skin and eyes. Do not mix with caustic alkali or chlorinated products.	 	SKIN: If contact occurs, remove contaminated clothing and wash affected area thoroughly. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Wear protective clothing and eye protection. For major spillages contain immediately then contact waste disposal company. For minor spillages spread soda ash over the spillage and hose down with water.
<div>B</div>	CAUSTIC ALKALIS & CHLORINATED PRODUCTS Causes burns on contact with skin and eyes. Solid material becomes hot when dissolving in water. Do not mix with acids.	 	SKIN: If contact occurs, remove contaminated clothing and wash affected area thoroughly. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Wear protective clothing and eye protection. For major spillages contain immediately then contact waste disposal company. For minor spillages wash away with plenty of water.
<div>C</div>	OXIDISING AGENTS Do not store or mix with other substances as fire or explosion may result. Chlorine products liberate toxic fumes when mixed with acids. Vapour or dust can be irritating. Do not mix with any other product.	 	SKIN: If contact occurs, remove contaminated clothing and wash affected area thoroughly. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INHALATION: If fumes inhaled remove patient from contaminated area. Apply artificial respiration if not breathing. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Wear protective clothing and eye protection. Pick up clean dry material with clean shovel and put in a clean dry container. Wash away any remaining spillages with plenty of water.
<div>D</div>	GENERAL PURPOSE DETERGENTS Can cause skin irritation through excessive exposure. Can cause severe irritation to the eyes. Do not mix with quaternary based Disinfectants.		SKIN: Remove contaminated clothing and wash skin thoroughly. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Mop up or flush away with water.
<div>E</div>	DISINFECTANTS & DEODORANTS (Quaternary Ammonium Based) Do not mix with Detergents.	 	SKIN: Remove contaminated clothing and wash skin thoroughly. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Mop up or flush away with water.
<div>F</div>	ALKALINE / CLEANERS Irritating to skin in neat form or strong solution. Causes burns to eyes.	 	SKIN: If contact occurs, remove contaminated clothing and wash skin thoroughly. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Pick up spillage with mop or wet pick-up, then rinse with plenty of water.
<div>G</div>	FLAMMABLE OR COMBUSTIBLE LIQUIDS & AEROSOLS Flammable or combustible. May irritate skin and eyes. Vapour may cause dizziness and drowsiness. Fumes may be toxic. Use in well-ventilated area.	 	SKIN: Remove contaminated clothing and wash affected area with soap and water. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Seek medical attention. INHALATION: Remove patient to fresh air. Apply artificial respiration if not breathing. INGESTED: If swallowed do not induce vomiting. Rinse mouth. Seek immediate medical attention.	Wear protective clothing and eye protection. Make sure area is well ventilated and there are no sources of ignition. Absorb onto an inert absorbent, dry earth or similar material. Wash affected surface with plenty of water.

DO NOT MIX CHEMICALS

INCOMPATIBILITY CHART: DO NOT MIX OR STORE CHEMICALS AS LISTED

Do NOT mix or store chlorine based products, or highly alkaline products with acids. Violent reactions will occur. Dangerous gases may be given off.

Do NOT mix or store with any other product. Contact may cause fire or violent reaction.

Do NOT mix quaternary ammonium based disinfectants with detergents. The disinfecting properties may be destroyed.

Store separately from all other products preferably in a flammables cabinet or store. Do NOT store near ignition sources.
